

STORAGE AND HANDLING INSTRUCTIONS FOR MOLDED PULP PRODUCTS

“Trakya Pack – Pulp Molding” Ltd.

Registered office: Bulgaria, Plovdiv, 4006, East District, 12 “Woodrow Wilson” Street

Factory address: Bulgaria, Stamboliyski, 4210, 1 “Klokotnitsa” Street

UIC: 204442473

With the present document, “Trakya Pack – Pulp Molding” Ltd. provides guidance to its clients on how to ensure the proper storage of molded pulp products so that they preserve their shape, strength, and protective properties.

1. Scope of the Instruction

This instruction applies to the following molded pulp products manufactured by Trakya Pack – Pulp Molding:

- 🌱 **PulProtect Air** (459 x 307 x 15.5 mm)
- 🌱 **PulProtect Pro** (712.2 x 350 x 16 mm)
- 🌱 **PulProtect Pro +** (788 x 389 x 22 mm)
- 🌱 **PulProtect Edge** (712.2 x 156 x 16 mm)
- 🌱 **UniGlass Single** – (400 x 135 x 120 mm)
- 🌱 **UniGlass Double** – (400 x 270 x 120 mm)
- 🌱 **UniGlass Triple** – (400 x 135 x 120 mm)

2. Storage Conditions

To maintain the integrity, quality, and protective function of molded pulp packaging, follow these guidelines:

2.1. Temperature and Humidity

- 🌱 Store at a temperature of 10–25°C and relative humidity of 50–60%.
- 🌱 Avoid sudden temperature changes.
- 🌱 Humidity should not exceed 60%, as this may cause softening, loss of shape, and deformation of the packaging.
- 🌱 Low humidity below 50% leads to excessive drying of the material and impacts its ability to absorb shocks and vibrations.

2.2. Protection from Heat and Sunlight

- Keep packaging at least 80–100 cm away from heating appliances and other heat sources.
- Protect from direct sunlight and strong air currents to avoid aging, color changes, and quality deterioration.

2.3. Protection from Moisture and Contaminants

- Protect from dust, moisture, and direct contact with water.
- Store only in clean premises that are regularly inspected and treated against pests (insects, rodents).

2.4. Transport and Storage

- Use closed vehicles and protected storage facilities with controlled conditions.
- Storage for more than 4 months is not recommended.

2.5. Customer Responsibility

- After delivery, the customer is responsible for proper storage and use of the packaging according to these guidelines.
